**Is your child suffering from any of the following** (please circle all that apply):

- Poor sleep / inconsistent sleep / unwilling to sleep on their back
- Excessive crying / inconsolable crying / painful or piercing cry
- Difficultly breastfeeding / poor breast feeding / feeding problems
- Colic / reflux / failure to gain weight / changes in stool or urine / digestive problems
- Dislikes being dressed or undressed / dislikes lying in certain positions / mis-shapen head
- Problems crawling or walking / delayed development / history of accidents, falls etc.

If your child is suffering from any of the above they could have muscle or joint problems cause by their positioning during pregnancy or as a result of being born. CHIROPRACTIC CAN HELP because we treat gently and naturally (without drugs) to remove the imbalances that CAUSE these problems.
